### Opening Comments

#### Reopening Prosecution and Withdraw From Issue

In light of obvious type double patenting issues, the Examiner has decided to withdraw the present application from issue. A new office action outlining the rationale for the withdraw follows.

#### Amendment Under 37 CFR 1.312

The Examiner has considered the amendment filed 2/7/06 and would have entered such an amendment but for the claim numbering issues. The examiner had cancelled claims 16-42 in the prior office action and thus applicant's response does not so reflect the change by adding (duplicating) claims 16-42 as new claims 73 and beyond. The Examiner does indicate at the end of this letter the scenario if those claims were present in the case.

#### Rejections Based Upon Obvious Type Double Patenting

##### Rationale

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2823

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

### The Rejections

Claims 1-15 and 69-72 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9, 11-16, 17, 21, 29 and 37 of copending Application No. 10/602315 in view of Song US Patent Application Publication 2002/0177282.

Claims 1-15 and 69-72 detail the manner of creating a dielectric layer composed of a hafnium oxide/lanthanide oxide combination layer. The claims of the present application and the copending are nearly the same with the exception in the manner of generating the hafnium oxide layer—the present application uses atomic layer deposition (ALD) and the copending application uses chemical vapor deposition (CVD). ALD is a form of CVD and the modification of the prior art is seen as an obvious development from the prior art in light of the Song reference. Song teaches that a hafnium oxide layer can be generated by either ALD or CVD and that ALD will provide more control of the layer thickness. See paragraph 0023. As the applicant has not provided any distinct benefit or advantage of ALD over CVD and as the manner of generation of the layers by ALD and CVD is seen as equivalent, it would have been

Art Unit: 2823

obvious to one of ordinary skill in the art to modify the manner of generation of the hafnium oxide layer of the copending application with the teachings of Song in order to have more control of the deposition layer's thickness.

This is a provisional obviousness-type double patenting rejection.

#### Closing Comments

While the examiner has only rejected claims 1-15 and 69-72, it should be noted that the claims cancelled by the examiner in the prior examiner's amendment would have been rejected under the same rationale as being obvious variations from the prior art.
